

BizNet

If you want a superior broadband service that provides businesses with high quality and exceptionally fast internet access, then BizNet is right for you. With a range of high capacity broadband plans, BizNet is designed to support the needs of larger businesses with growing demands.

Being built on our next generation fibre network means you get an enhanced broadband experience through faster internet speeds and high throughput. You can be assured that your internet service will not be compromised or impacted, to allow multiple users to enjoy a high quality internet service at the same time. Available to customers on a 12 month minimum term who have their phone line and calling with TelstraClear.

Product Benefits

- Very fast internet speeds
- High quality broadband
- Maximum reliability and security
- Extra capacity

How these plans work:

1. Ask us if you are located in our cable or fibre areas
2. Choose from three simple plans: BizNet Gold, Premium or Supreme
3. Select a data usage pack to go with the access plan - 1GB up to 20GB for the billing period
4. When you finish the data pack, we'll automatically allocate you another one of the same size, charged at the same price. With these 'pay as you go' plans, this means you can avoid any unexpected usage charges at the end of the month.

Please Note:

These products can only be supplied in specific areas and your order is subject to a prior site survey and port availability. Early termination charges apply at \$49.95 per month of any time remaining on the contract. Installation charges are \$220.44 or \$88.88 if a site visit is not required. GST is payable in addition to all prices. Standard TelstraClear Business and Business Internet terms apply, see www.telstraclear.co.nz/go/terms for details.
