

# iPhone Settings

## How to change the settings on an iPhone to use it on TelstraClear mobile.

The iPhone is not capable of receiving data settings as a text message, so will need to be configured manually.

1. On the handset, tap Settings.
2. Scroll to and select General.
3. Scroll to and select Network.
4. Select Cellular Data Network.
5. Select the APN field, and enter [www.telstraclear.net.nz](http://www.telstraclear.net.nz)
6. Tap return.
7. Username field can be left blank
8. Tap return.
9. Password field can be left blank
10. Select the MMS APN field and enter [wap.telstraclear.net.nz](http://wap.telstraclear.net.nz)
11. Username and Password can be left blank
12. Scroll to MMSC field and enter <http://telstraclear.nzmms.net.nz/pxtsend>
13. MMS Proxy should be 172.030.038.003:8080
14. Press the home button to return to the main screen.
15. Tap Safari.
16. Tap on the address bar.
17. Enter <http://www.telstraclear.net.nz> and tap Go.
18. Wait for the page to load, then tap on the add symbol.
19. Tap Add Bookmark.
20. Enter TelstraClear as the title, and tap Save.
21. Press the home button to return to the main screen.

**Please Note:** iPhone can not be used as a tethered modem on TelstraClear. This is due to the way Apple have configured the handsets.

## TelstraClear Voicemail on the iPhone

TelstraClear's Voicemail number is +64298500500

The iPhone has Vodafone's voicemail number hard-coded into the device and this can not be changed.

This means the iPhone Voicemail icon wont work

### There are several options:

TelstraClear's Voicemail number has been loaded as a contact on all SIM cards, so can be called from within the contacts menu

Set the Voicemail contact as a "Favorite" and dial from the favorites menu

Set up a speed dial icon on the homescreen (as below)

1. Open iPhone Browser
2. In the URL field at the following: <http://0064298500500.tel.qlnk.net>,
3. Hit Go
4. It will ask if you want to call, press cancel
5. Now press the + sign
6. Now add to home screen and label as Voicemail then hit Add
7. This will add a link from the home screen to our voicemail platform direct. It will look like this

This process will also work for adding other numbers as speed dial icons from the homepage.
